

MACAW

Facts

- Macaws are the largest bird of the parrot family.
- They can live as long as 60 years!
- They have a bone in their tongue to help crack open nuts and fruits.
- Macaws like to socialize and can gather in flocks of 30-100 birds.
- The smallest macaw is the mini macaw which can be about 12 inches from head to tail. The largest macaw is the hyacinth which can be 3.5 feet (1m)!

Macaws are believed to be one of the most intelligent bird species.

Proverbs 9:10

The fear of the Lord is the beginning of wisdom,
and the knowledge of the Holy One is understanding.
